Securityholders may also contact us using one of these methods to request a copy of the investment fund's proxy voting policies and procedures, proxy voting disclosure record, or quarterly portfolio disclosure.

Management Discussion of Fund Performance

Investment Objective and Strategies

The Global Equity Fund seeks to provide long-term growth through capital appreciation by investing primarily in a diversified portfolio of equity securities of Canadian and foreign companies established in the United States, Europe and elsewhere.

The strategy involves selecting securities from the global equity markets. The investment process starts with a systematic and unbiased quantitative system that generates lists of stocks with high risk-adjusted return potential. Candidates for final selection usually have "momentum" (stocks that have had the largest price increase in the past months) or strong value characteristics. The fund has a tendency of allocating more weight towards momentum stocks as compared to the value ones. The fund has a bias towards large capitalisation stocks. The portfolio of the Fund is systematically reviewed on a monthly basis.

Risk

The overall level of risk of investing in the Fund remains as discussed in the Prospectus. During 2012 the Fund started investing a part of its portfolio in "value" stocks. This increases the number of securities in the portfolio and increases sector diversification. Accordingly, the Fund remains suitable for the same investors as discussed in the Prospectus.

Occasionally the Fund is highly concentrated in certain sectors, even though such concentration may not necessarily correspond to the sectors weight of the MSCI World Total Return Index. The Fund is not designed specifically for diversification. A large concentration in one sector may increase its risk.

The Fund and its benchmark are in USD. This results in a currency risk for the Canadian investor.

Results of Operations

The U.S. positions in the portfolio once again generated solid results in the first quarter, enabling the Global Equity Fund to generate a 8.7% return over the first three months of the year.

The Fund continued to maintain a geographic allocation comparable to that of its benchmark, with about half of the portfolio invested in the United States and about 25% in Europe, including Great Britain. From the standpoint of sector allocation, the Fund continued to be quite broadly distributed during the whole year, except that it privileged from time to time the consumer discretionary sector while underweighting the energy sector.

In addition, the Fund slightly reduced its position in the United States to focus on investments in Europe where economic indicators were much improved from the middle of the year.

The Fund's U.S. investments have performed well in 2013 with an increase of 33%. The return was almost as high on the Japanese stock market while European stocks had somewhat mitigated results because the momentum factor did not prevail in Europe last year.

Recent Developments

Economic indicators point to a strengthening of the U.S. economy in 2014 and in the following years. Meanwhile those indicators are even more favorable in Europe and Japan for 2014.

On the other hand, there are growing concerns on the outlook of emerging economies, particularly China and Brazil. The Fund does not invest in emerging countries but their share in the global economy is becoming more and more important, and so, an important weakness in emerging economies could affect the global economy.

Furthermore, events in Ukraine in early 2014 could have a negative impact on Europe because many European countries depend on gas from Russia, which is transported by pipeline through Ukraine.

In 2013, Landry Investment Management Inc. welcomed two new shareholders, Benoit Brillon, the Chief Investment Officer, and Champlain Investment Management, a company associated with Champlain Financial Corporation Canada. The latter is not involved in the daily operations of Landry Investment Management Inc. These two new shareholders will be able to increase their participation in Landry under certain conditions over the next few years.

In 2014, the financial statements will be presented under IFRS. The Manager is of the opinion that the change will have no impact on the performance of the Fund.

Related Party Transactions

In consideration for management services and investment advice provided to the Fund, the Manager (Landry Investment Management Inc.) is entitled to a management fee.

The management fee with respect to Series A units is 1/12 of 2.00%, Series B units is 1/12 of 2.25%, 1/12 of 1.00% for Series F units and 1/12 of 1.50% for Series G units, calculated on a daily basis to the net asset value of the Fund and payable monthly.

The Manager receives a performance-based fee for the Fund. The Manager will charge a performance fee of 20% of the return of the Fund in excess of their benchmark return. The performance fee is payable only if the Fund has outperformed its benchmark (MSCI World Total Return Index) since the last time a performance fee was paid. Performance fees are calculated daily and crystallized and paid monthly. No performance fees were paid over the period.

Other Material Information

Series B and G units of the Fund were redesignated as units of Series A and F respectively as of April 8th, 2013.

- (1) This information is derived from the Fund's interim financial statements and audited annual financial statements. The net assets per security presented in the financial statements differs from the net asset value calculated for fund pricing purposes. An explanation of these differences can be found in the notes to the financial statements.
- (2) Net assets and distributions are based on the actual number of units outstanding at the relevant time. The increase/decrease from operations is based on the weighted average number of units outstanding over the financial period.
- (3) Income, dividend and/or return of capital distributions, if any, are paid in cash, reinvested in additional units. There were no distributions for the Fund.

(1) This information is provided for the years ended December 31.

(2) The impact of the adoption of the accounting policy Section 3855 on net assets may result in a different valuation of securities held by the Fund, for financial reporting purposes, than the market value used to determine the net asset value of the Fund for the purchase and redemption of the Fund's units.

(3) Management expense ratio is based on total expenses (excluding commissions and other portfolio transaction costs) for the stated year and is expressed as an annualized percentage of daily average net assets during the period. Out of its management fees, the Manager pays for such services to the Fund as portfolio manager compensation, service fees and marketing. Management expense ratio is inclusive of performance fees.

(4) The Manager, at its discretion, waived and/or absorbed a portion of the fees and/or expenses otherwise payable by the Fund. The waiving and/or absorption of such fees and/or expenses by the Manager may be terminated at any time, or continued indefinitely, at the discretion of the Manager. Management expense ratio is inclusive of performance fees.

(5) The trading expense ratio represents total commissions and other portfolio transaction costs expressed as an annualized percentage of daily average net assets during the period.

(6) The Fund's portfolio turnover rate indicates how actively the Manager trades the Fund's portfolio investments. A portfolio turnover rate of 100% is equivalent to the Fund buying and selling all of the securities in its portfolio once in the course of the year. The higher the Fund's portfolio turnover rate in a period, the greater the trading costs payable by the Fund in the year, and the greater the chance of an investor receiving taxable capital gains in the year. There is not necessarily a relationship between a high turnover rate and the performance of the Fund.

Management Fees

Management fees are based on the NAV of a series and are paid by the Fund to Landry Investment Management Inc. They are used to pay for sales and trailing commissions to registered dealers on the distribution of the Series' units, as well as for investment advisory and management services.

Series	A	B	F	G
Management fees	2.00%	2.25%	1.00%	1.50%
As a % of management fees:				
Dealer Compensation	50.0	44.4	0	0
Investment advisory and management services	50.0	55.6	100	100

Performance fees

The Fund pays Landry Investment Management Inc. a performance fee equal to 20% of the amount by which the return of the Fund exceeds the performance of its benchmark index. The performance fee is payable only if the Fund has outperformed its benchmark since the last time a performance fee was paid (high-water mark). It is calculated and totalled each day, so that the price per unit on a given day reflects the performance fees payable at the end of that day. The performance fee is paid by the Fund on a monthly basis. A performance fee may be paid by a Fund to Landry Investment Management Inc. even if such Fund had a negative performance. No performance fees were paid over the period.

Past Performance

The performance information shown assumes that all distributions made by the investment fund in the periods shown were reinvested in additional securities of the investment fund. The performance information does not take into account sales, redemption, distribution or other optional charges that would have reduced returns or performance. Also, how the investment fund has performed in the past does not necessarily indicate how it will perform in the future.

Year-by-Year Returns

The following bar charts show the performance for each of the years shown, and illustrate how a series' performance has changed from year to year. In percentage terms, the bar chart shows how much an investment made on the first day of each financial year would have grown or decreased by the last day of each financial year.

« 2011 » represents the returns from the creation of the Fund on April 5, 2011 to December 31, 2011.

« 2012 » represents the returns from December 31, 2011 to December 31, 2012.

« 2013 » represents the returns from December 31, 2012 to December 31, 2013.

Series B and G were redesignated as series A and F respectively so they no longer had assets under management at the end of the 2013 period. Also, series A had no assets at the start of 2013. This explains why those series don't show returns for 2013.
